

Specifically engineered components to address the unique requirements of a project.

LOCATION | PLANNING | INFRASTRUCTURE | AMENITIES

● PLANNING:

Urban planning is an essential when it comes to efficient functioning of a community. Our projects are planned according to the natural topography of land. Facilities have been designed & located, with proximity as a priority.

Keeping in mind the pact of **New Urbanism**, the aspects being pedestrian friendly neighbourhood, vehicular safety, rain water harvesting, organic horticulture and many other eco-conscious innovations, **Daivik Developers**, will ensure a healthy lifestyle for you and your loved ones.
